

PRODUCT DATA SHEET

Lubrall Rustoclean-141 (Industrial Rust Remover Chemical)

Lubrall Rustoclean-141 is a highly effective, colourless rust remover chemical designed for industrial applications. This product excels in removing medium to heavy-duty rust and black stains from metal surfaces. Its acidic formulation ensures thorough rust removal, making it a reliable choice for maintaining the integrity and appearance of industrial components.

Key Features

- 1. Colourless Formula:** Rustoclean-141 is a clear solution, ensuring no staining or discoloration of metal surfaces during the rust removal process.
- 2. Medium to Heavy-Duty Rust Removal:** Specifically formulated to tackle stubborn rust deposits, Rustoclean-141 effectively eliminates both medium and heavy-duty rust.
- 3. Black Stain Removal:** In addition to rust, Rustoclean-141 also removes black stains that often accompany rust, restoring the original appearance of the metal surface.
- 4. Acidic Nature:** The acidic composition of Rustoclean-141 ensures efficient rust dissolution, making it a powerful solution for industrial rust removal needs.

Application Methods

Rustoclean-141 can be applied using two primary methods, depending on the size and shape of the components being treated:

- 1. Brush Application:** For localized rust removal, Rustoclean-141 can be applied directly to the rusted area using a brush. This method allows for precise application, ensuring the product targets only the affected areas.
- 2. Dipping Method:** For larger or more complex components, the dipping method is ideal. Submerging the parts in a Rustoclean-141 bath ensures even coverage and thorough rust removal, especially for intricate shapes and hard-to-reach areas.

Post-Treatment

After the rust removal process is complete, it is crucial to apply a suitable rust preventive oil to the treated surfaces. This step provides future protection against rust and corrosion, ensuring the longevity and performance of the components.

Applications

Rustoclean-141 is suitable for a wide range of industrial applications, including:

- Manufacturing: Removing rust from machinery parts, tools, and equipment.
- Automotive: Cleaning rusted engine components, chassis parts, and other metal surfaces.
- Construction: Treating metal structures, beams, and tools exposed to the elements.
- Marine: Protecting and maintaining marine equipment and vessels from rust and corrosion.

Conclusion

Lubrall Rustoclean-141 is a versatile and powerful rust remover chemical that effectively addresses medium to heavy-duty rust and black stains. Its ease of application and efficient performance make it an essential product for various industrial maintenance tasks, ensuring metal components remain in optimal condition. By following up with a suitable rust preventive oil, users can extend the protection and lifespan of their treated components.

Specification :

Appearance:	Colourless Liquid
Odour:	Typical organic
Specific Gravity:	>1.2
Ph Of 5% Solution:	2-3
Flash Point:	NA
Active Matter:	75%
Refractometer Factor:	Not applicable
Biocide	Present

Packing: - 20/50 Liter drum.
